Certainly, here are the transcriptions from the YouTube video sources provided, presented exactly as they appear in the sources:

## \$7 Program | A Million Dollar Plan

- if you're getting this video from me then I consider you someone that I can send a quick informal video and a first PowerPoint presentation that I haven't done any presentation on this project but I consider you someone that knows me someone that uh we've done business before someone that knows this industry as well and I like me you may be frustrated about having to restart your team over and over and over and over um and looking for something to have as a legacy project I went as far as looking at health and wellness projects uh travel projects something outside of the volatility of passive programs um because they tend to not be around um a year is is lucky if you get uh that in these programs but something very interesting is happening in a program that I know the the creator of from many years back but over a year ago um he told me about this idea he has by the way he has made tens of millions of dollars in this space probably close to 450 million in one project and so he is putting his money to making this platform which is I think going to be a home base for uh um so many of us and and I'll explain through the presentation slide why I think that is the case but main point of this video is to to to get across to you that if you have \$7 plus \$50 before Valentine's Day at a certain time lock in this like early bird position because it has a million dooll possible uh um payout if you meet some other uh Team requirements over two years but if you don't get in before that time on Valentine's Day with the \$7 and \$50 then um the requirements are higher and and if I can put you guys in a better position to make such uh an amount um with less requirements and we have the time to do that um then then why not so let's dive in to this \$7 program which I absolutely think is going to change the game change the industry change uh our approach to it so this is the main problem in our space which is there's too many scams uh MLM crypto MLM crypto tokens and unsustainable daily Roi programs have a proven 99% failure rate unethical owners create fake schemes that low innocent with greed and fear of missing out only to steal their money even ethical leaders have been caught out of these lies absolutely true the solution ow
- really is needed in our industry talk to you guys soon peace

## \$7 Program | BIG Money Comp Plan

- early and on time which is awesome so uh I'm just going to get straight into it and then uh others will jump on as they do as we go on So today we're going to focus on the compensation plan and how to maximize the earnings from that so uh one second let silence my devices there you go so yeah to make the most of the Compensation Plan um there's a lot of power in it you just need to see where it is I'm going to cover exactly where that is and uh for those that might be new here for the first time I'll do a quick overview on the vision and the project so just do that thank you for joining us today thank you for uh listening to the person who invited you here today and coming along with an open mind whoever's sharing this uh opportunity with you has done so because they care and you're about to witness something that's pretty extraordinary something quite unique and different than uh anything you may have seen before Before we start please take a

screenshot of the income disclaimer and make sure you read that in your own good time it simply says that there's no guarantees of daily return on investment program being offered here there's no uh like uh fixed income programs or anything like that what we're going to show you is a real platform that allows you to earn from real businesses and it really is as simple as that so funny enough as simple as it is it's a revolutionary idea nobody's done it yet uh one single platform called my business club with unlimited opportunities built inside of that club all right so you become a member of the club and then you get exclusive access to the phenomenal deals and the focus of the deals that we're going to bring to the table going forward is around wealth building and wealth creation all right so intention is everything and I've often said this you can have really really low quality products and services and you know build huge businesses just to scam people which is often what happens out there in the world right unethical cloners that create elaborate schemes to steal from people that's quite common is quite normal on the internet and often times people with great intentions good leaders good people get caught out by the sophisticated scammers and so it's the intention of

## **BitFoot | Automatically Copy Million Dollar Meme Wallets**

- he description of course you're more than welcome to get back to the person that has shared this with you to begin your journey but I am seeing something unique and it's definitely worth checking out peace it's called bitf foot and quickly said bitf foot is the fastest trading platform that's out there you might have heard of sniper Bots because it's more trending in the Miko market and quickly explained what is a sniper bot sniper bot is a tool that helps you especially in the decentralized market for meme coins to buy faster and to sell faster why is speed so important because everybody who traded in mcoins know that the market is way more volatile than the crypto space why because the market capitalization is way smaller meaning a little volume can already increase the price a lot There's a lot of charts a lot of new tokens launched where you can see in the minute chart that the price increases for 80% in only one or two minutes and if you do manual transactions for example for UNIS swap for phantom for other wallets these transactions can take up to for example 15 seconds and if you're unlucky and the price surges too high the slippage is too high then the transaction fails and you have to do it one more time meaning then you are 30 seconds 45 seconds or even 60 seconds later in the market than you actually wanted to do so you're missing out on profits on every entry and on every exit and that's where sniper bot is essential and that's also one reason why every mcoin Trader that's doing it on regular basis and doing it professionally use as a sniper bot because you can enter the market faster you can exit the market faster and here with bitf foot we are the fastest sniper bot that's on the market and I always say okay people can easily say we are the fastest and PDFs can also easily be editable that's why we also have the proof where we show the people because we are openly showing everything how the action is really working I can show you right away how this whole proof that we share also with the community and will be also available to you to share with others where on the right side we can see a wallet which is doing manually a transaction on the left side we see right now the top five best sniper bots
- on the market we have banana gun we have myestro we have ubot and we have Trojan and on the other side also bitf foot All those sniper Bots are connected through copy

trading with this wallets that will do now a manual transaction and you will see how fast every of those sniper Bots recognizes the transaction and then execute it very important to understand recognizing is not executing because you will see that there's other sniper Bots that also recognize at the same time as bitford but they don't execute and execution means that from this moment you are in the market and not from just recognizing so I will share this real quick with you you can see here the swap transaction is being done and in the same second you can see it's done bito right away already recognized the transaction Trojan also detected the transaction but if we look closely we see here bitford as the very first one only like a few milliseconds later also already executes the transaction on the open market market And here comes the big big Edge because if you look closely now how long the other sniper Bots need to execute because you can see here detected buy copy but it's still not executed as it's showing private transaction sent waiting for result so here we will see okay it's 2 seconds it's 3 seconds it's 4 seconds now it's the next one the transaction executes successfully and from then on we can see further that it also happens for example on one side we've done myestro executing and on the other side that with' also Trojan and banana gun so here we have an edge really with the speed over the market and especially when we talk about copy trading it's even more interesting because you have to imagine there is Insider wallets out there and people that are following those wallets and if people use a slower sniper bot and you use the fastest one and following this uh Insider wallet you will always be on First Position meaning the people that use the slower bot will be your volume that you can already use as profit that's number one and why speed is so essential Coming to the second part which bitf also provides and that is our Academy section Here all the people get access to our ultimate sniper Community where they get the knowledge like o

- ne of our experts in the team that made in the last mcoin cycle seven figures and profit and he shares his knowledge his strategies with everybody we have a community chat we will have weekly calls and we will also have a video Academy section where we'll dive deep into those themes like finding for example new coins what to look out for what are the for sniping strategies mecoin dip strategies where we look at the structure and show you how to find the best entries and I think what's most interesting for everybody is how to find find and copy those Elite Traders We also like to call them Insider wallets because if you look at the price structure of mean coins you mostly see the same thing at the bottom only a few Traders enter then the price surges for like 5 10 20 x and then they sell with the most profit and the reason why they enter so low and can make so big profits mostly is because of Insider information that's why we call them inside wallets and the good thing here is as the blockchain is completely transparent it's possible to track those traders to find out their wallet and to copy and paste them into our sniper bot meaning from that moment if this Trader also has in five days or in 10 days another Insider information and buys the token you don't have to do anything because his wallet is connected to yours through our copy trading system and in the same moment he buys your wallet also executes the same trade in the same moment he sells with profit your wallet executes the same trait So how does this look in action I can show you right away so here for example we have the sniper bot active on our Telegram and for us it was really important to make the onboarding as simple as possible meaning you just start the bot and from there you click on copy trade So from the moment where you click on copy trade you just can insert a wallet that you found on one side that we as a community give

out to everybody and on the other side also through the academy we show how we select wallets and finds them so you can also take the strategy and look out for wallets every single day also by yourself so here when you want to add a wallet what you do you click on ADD wallet you give it a name for example task one I have th

- en an address I can type in here and then I just confirm an ad If I confirm on ad the wallet is then implemented in here and from that moment every single trans ction that this wallet is doing my wallet is also executing The best part here is because some people will ask okay but some Traders they trade with 5,000 with 3,000 with 2,000 I don't have that kind of money so we also implemented here another setting which when you click on the wallet itself it's called amount mode So here I can click on it and I can type in for example 0.1 salana meaning from that moment it doesn't matter if the trader trades with \$ 10,000 000 with 5,000 with 50 my wallet will execute it with 0.1 Solana meaning \$15 So the full control is on your side and you don't have to worry that you lose everything with one trade because the settings you can individually paste in and trade like you want and the best part of it is the user himself is 100% in control meaning there is no third party that is working with your money or you are giving your money away but the money is always on your wallet and you can withdraw every single second everything You can withdraw every single second every profit and you even have the possibility in an active copy trade for example the trader wants to sell at 200% but you say Okay 120% is enough for me you can manually close the trade and also withdraw that amount So 100% control on the user side I think that's a very very important point here and from the moment where we have the copy trade activated you don't have to do anything you will just get the notifications when our software recognizes a transaction This will look like that and you will get the notification on telegram meaning it will show you for five salana this Trader bought for example Zasha and my wallet copied for 0.1 Solana that trade he bought for 0. Solana and he sold for 35% Same thing a little bit later he bought lar for 0.1 Solana and he sold for 41% And I think here a very important part is also the automatic marketing So here we wanted to make it as simple as possible to share this results meaning that every time a trade is closed you will immediately get a picture showing you the details of the trade the token that you bought how long y

### **Game Plan For Re-Starting From \$0.00 To \$100,000 Per Month**

- this is an update on this opportunity this is a tutorial on this opportunity and while those are necessary um it's not as personable it's not as um like hey guys this is what it takes to do well in this industry because you we all have the same opportunities yet why do some of us do better than others it has a lot to do with our mentality lot to do with our devotion of time
- lot to do with our skills a lot to do with our hunger of of lot to do with knowing the right things to do and doing the right things consistently all of these things are an important piece of the puzzle to taking any opportunity and maximizing it and that is something that I'll be creating content around um is not just here's opportunity a b c d but rather hey guys this is how you do a
- can participate in what I do and you should do you should you know take my service or join my whatever um and and not like ask the right questions like I really appreciate the people that says hey s i I'm doing some project or what not would it be okay if I share it

with you and I'm like I really appreciate you you asking that as opposed to the other person that's just verbal diarrhea all right right in the inbox so um this is why something like voice notes which I'm um not only getting to do more and more I'm trying to limit my text also it's easier to just say what you want to say versus typing what you want to uh uh type um and also what I'm getting uh what has been the foundation of me building a lot of strong relationships with with people that I've never met or people that I've met later on in

## **Get Paid Daily To Do Social Media Tasks!**

- oing to do new products gain trivia so on the six month we're going to improve our compensational plan uh on the next 12 month so we're going to do um a big ecosystem of a streaming platform and at the end um on the next two years so we're going to launch our new freelancer platform uh similar to Fiverr which is going to make and help more people because you will be able to access on the platform as a user so you will be able to put your talent uh andell your talent into the platform so it will make you more um in for you like as you sell your talent so I want you to join uh without best in so don't wait any longer so just boot your social presence and just come to this unique opportunity so you can register here um through your leader which is going to help you with that and it's going to give you more detail about the registration Pro process awesome thank you so much Joel for covering the PowerPoint portion of what we have to share what's also really really cool is just the future layout of all the things that you mentioned that you're expanding into um other ways that we're going to be able to provide much needed service and value to the real world and see the profits I mean it's this is an actual business you know how they have um the social media agencies this is like that in fact I think on one of the slides it said that you could kind of resell the service as if you're providing the service so that's also a business in a business so that's something that's very interesting for those that want to take the initiative to say hey you know what I see the need for this in the market uh social boosters providing all of this on the back end I can be the middleman to say hey how would you like to expand your reach on your live streams or get more followers real people uh get more comments get all these other things and you can put your little markup on it and they can send you the links to where they want um this this service to be uh sent to or or on what post and you can put that post Link in your back office which by the way we're going to dive into an actual back office so welcome to social booster. net of course you'd want to get here through the referral link of the person that shared this opportunity with

## **Gifting Back | Connecting Orphan Girls With Lonely Mothers**

- practice practice fore for foree he

## **Pop Max | \$435/Day + Live Withdraw (Sleeping Giant)**

- hey there PopMax Tribe Guess who's back from his 36th country Can you tell by the cool hat of a tiger fighting a dragon in the midst of cherry blossoms that it was Japan And you know what I realized in this wonderful tour and adventure of this magical land of uh

weird culture and amazing cuisine and climate it is that I realized that I am a bonafide workaholic Uh in the midst of all this beauty and all of this culture and all of the diversity to dive into of this new way of life I was itching like just trying to get back to you guys trying to get back to like a few minutes of working And uh I realized how much I enjoy the progress that uh we get to make by sitting at our phones or laptops or wherever we may be And this gamification of business that uh we get to participate in it is something that when you step away you realize how fun it can be With that being said I have so much updates for you guys I've been working behind the scenes creating some wonderful content that if you have not make sure to watch them you can find all of them in our team YouTube channel the gifting tribe starting with this video here which is a great 3minut sizzle video that summarizes the big picture of what pop social is and our participation in it and then if you want a presentation that covers both the the concept of the social media that rewards us plus the business elements and the comp plan and how you make profits on profits This is now our 18minute presentation that covers all of it Uh if you want this video to upload onto your own platforms let me know I can send that file to you And then over here we have the weekly update call by Magnus the CMO chief marketing officer of Pop Max With that being said let's dive into some quick little uh photo uh uh reel of uh my ventures in Japan which I was very much looking forward to This is me with a train A lot of cool trains there There's a place where if you bow down to deers they also bow down and they're trained kind of to do that because then you reward them with food This was a really cool day of seeing a lot of temples and uh other Japanese just architecture and things Now I bring that up because if you want to visit Asia there is a PopMax event happening like the one that happen

- how many people I reached out to and touched base with By the way this app is called counter or you could find any counter app But this is like a means by which I can track my effort in the day And I urge you if you want to change your life reach out to a 100 people for the next 100 days Your your income can 10x uh whatever you're making here with pop It's just a small little sample of what is possible if we put more fuel into the fire So let's dive deeper into what we have in uh the rest of what I want to show you here Oh more pictures So if you guys want uh you know to be able to take these pictures yourself come meet the company in South Korea in what seems to be a really cool place I'm hearing called Guju Island I've been to South Korea but never this island So looking forward to that adventure Um and then here again the website of POP and all that stuff what they're aiming to do Uh great little interview with Michael Shen the CEO of Pop Social The token not only listed on Coin Market Cap but listed on three of the top 10 exchanges in the world Bybit BitGet Mexi Gate.io all listed It's incredible to have this from day one Look at this For those of you guys that have been around you may have remembered when the 24-hour trading volume was under a million Today it's at 6.1 million of trading volume in the last 24 hours It's remarkable the growth that we're seeing It's it's really starting to pick up These are individual flyers that I made for the different staking periods that you can find in our team telegram Feel free to share those and it breaks down some of the math of \$100 \$1,000 and \$10,000 It's past midnight for me and so it's definitely past my bedtime but I wanted to get this video out to you so that you can have kind of the latest and greatest Um this is the comp plan which is a matching on your team's daily earnings starting with 15% direct which is very powerful If you watch this video that um Magnus did here he he really does a good job of showing why this ongoing

slow but consistent um matching versus one time uh like 15% of deposit why the slower 15% of profits daily is the better outcome and ultimately pays you more Uh he does the math on that So uh feel free to watch that Uh and you know

- deeper We're going to actually I'm going to do a Zoom call with Magnus later this week of uh diving deep into the comp plan and the power of comp plan because there's guys in Asia that are making,000 2,000 3,000 \$5,000 a day But there aren't these kinds of numbers in the English market We are the English market It's up to us to decide how big we want to grow this into the English market Because guess what How many people have you heard bring pop to you That should tell you how much it's been in the shadows and how uh big it can be if we get it out there which right now it's getting it's getting out there because uh for example I had one of the guys that I was sharing this with for like two months but he's been busy doing other things Finally someone else shared it with him and he's like "Hey isn't that what you were talking to me about and now now he's like "Okay now I got to take a look at this." So here's a quick summary of the major bullet points Again you can find find this flyer in our team telegram You can also find this one in our team telegram as well I want to show you something This was my total team volume as of like yesterday Uh which by the way yesterday someone just dropped in 10,000 because it was like uh not 422,000 So I was like cool Like they grew by 10,000 And then today um unexpectedly it grew again by another 10,000 432,000 And guess what Someone I know is in the midst of converting some crypto and they're putting in 10,000 These are three different people And so things are starting to pick up The word is getting out there So let's go ahead and do a withdrawal Right now I'm at \$435 a day So look at this My my earnings in the pool was,081 and then,08 and then 1,094 because whenever you have teammates that join at a particular time it's timestamped and 24 hours from that time they get paid and you get the percentage override depending on your rank So we're going to refresh this 1,094 and uh,095 So it's growing around the clock With that let's go to transfer to asset balance uh maximum here And then we are going to this 10% uh of of the conversion withdraw fee So I'm getting \$985 in PUSD There it is By the way if you want to transfer PUSD to anyone else you can go here and then click transfer
- pens let me tell you about NX1 to create the account Right now they are not yet on the app store and they don't have a desktop version but this is a exchange that you can use anywhere around the world without a VPN and minimal to no KYC So the way you get this onto your phone there's one way for Androids and then there's another way for iOS but the link to download it is in the description of this video So make sure to uh look in the description of how to download this Um and if you need any help feel free to reach out and I'll guide you through those steps so that you can have this app on your phone and you can then guide your teammates to do the same It is very very smooth after you get it onto your phone So let's go to withdraw And there we have the \$974 in uh USDT And then you can choose which chain of USDT that you want to withdraw in Binance Smart Chain USDT TRC20 Soul ERC20 We're going to withdraw this in USDT TRC20 So you can click on that You can also save some wallet addresses in your address book or paste a new address to do that Make sure to longhold the wallet address and paste it in there So I'm going to paste my wallet address in there and the amount You can select all of it and there should be like a \$2 fee to do the withdraw Click confirm Now withdraw Email verification When you get to this page uh they won't send out an email verification unless you actually hit get verification code So click get verification code and then they'll

email it to you and uh type the verification number into your right there So that's 727162 727162 and then confirm And then you have a sixdigit uh pin code to input as a security feature And then now you can go and see the receipt of your transaction and within a few minutes it will land in the wallet of your choice uh in the form of the USDT that you wanted So this is a convenient way that you can teach your teammates to convert their PPT into USDT completing the whole cycle of starting with USDT into POPMAX generating the daily yield uh withdrawing or converting the PUSD into PPT withdrawing the PPT from POP into their web3 wallet and then ultimately into an exchange whether it's BitGet or Mexi for NX1 which I'm really enjoying the process of and then sending um do

- rger deposits seeing that now with people that have been in for months now are starting to refer others Um and again the English market has been very much left behind due to lost in translation due to not having an English CMO due to so much else that uh we could point to but now is being put in place for us to really do well So happy to see uh the growth and um day by day the numbers are growing and hopefully you're seeing that for yourself in our Facebook groups and which by the way there's like daily rewards that are being given away on the Facebook uh group where if you post your daily results uh one of you guys would win um and so feel free to do that as well as uh in our team telegram there's results so many other places that you can find results of what's happening with our team and how you can be involved in this growth So wanted to get this out to you before I head to bed on what was a hyper productive day The first day I felt like I was truly building because I had so much of the content that I needed in place and now it's time to skyrocket So with that I will catch you in our team communities and uh well if you need me for a one-on-one just reach out and we'll get this launch together so that you can 10x your results with PopMax Catch you guys around and on our continuous growth to maximize the opportunity we have in front of us Talk to you soon Peace

### **Pop Max | All Time High Price + 2500 PPT Withdraw**

- ht here I'm going to send 2,500 uh which is \$375 uh so I'm confirming to send that so while that is on the way uh to my Mexi I want to show you something um that is really powerful which is not just my cat sleeping here with me but uh what's happening internationally with this opportunity and how Global it is I know that we are all behind the screen in our different parts of the world so it's very helpful to see the momentum that is happening on a global scale because it's not just something that is is small for uh us to not know the big potentials of because where there are communities it's really blossoming so take a look at this this is our team Telegram where you can see so many activities uh around the world so presentation and so I'll come back in here I just saw that I got the email from Mexi that the funds have landed in the Mexi account so let's just go ahead and proceed with that because we'll have more time time as we wait so if you go to wallet here and then um spot you'll see the balance of what has landed it'll show the balance in usdt that doesn't mean that it is it's just showing your total net worth of your portfolio in usdt the Holdings right here by the way you can uh click this right here Hide small balances so that you can just see uh what you have so I have 2500 PPT uh at \$371 now if I click on this spot and spot that's where I can either Buy buy or sell in order to buy I need usdt in my wallet um and and in order to sell I need PPT to sell so here on the

left hand side you can choose the pair which will be PPT usdt right there and then um on the right hand side again right now I'm selling but if you want to buy you need usdt and then you'll buy PPT which you need on the staking side you have your staking amount in p PPT so I'm going to go to sell and you can type in the amount here or you can slide this toggle all the way to the end you can choose limit which you can set a limit price that you want to sell or you can sell at the exact market price so I'm going to do that I'm going to hit sell PPT and right here it says ordered successfully so there it is uh it's done now we can go to wallet we can go to spot and we will see that the balance now is in usdt at \$369 now um I would say giv

- e it a minute or two before you execute a withdraw because there's something that that is updating because otherwise it will show that your balance is zero let me show you what I mean so that you don't freak out uh when you try to do this withdrawal so I'm grabbing my address of my same wallet which does it doesn't have to be the same wallet it can be any wallet um um by the way then you can also convert the usdt into other cryptos here if you want but I think most of us like usdt um and then you can choose uh you can paste the address and then you can choose the chain uh you can get it in binance smart chain Tron chain you'll need a Tron wallet and address there uh you ethereum chain Soul uh madic right there for this uh example I'm going to use BMV chain and then if you hit select all you'll get this zero incorrect quantity format so don't freak out just give it a minute it will just update and with that we can we can go back into uh what I was trying to show you on Telegram and we'll come back in a minute to uh do that first major International Event happening in maau China on March 25th the requirements of being flown there and accommodated are in the team telegram you can look at those for yourself uh this is an office for popmax you can see it written on the glass wall uh they have meetings and conferences and and Mastermind I had posted when uh PBT was at 13 cents and now it's at 15 cents so much activity so it's just nice to see this and uh here is the events so a lot of activities going on around the world uh say hello to my little fuzzy friend who just woke up from his or her nap I don't know if it's their nap okay so they will just get cozy here uh as I show you the withdraw part because I think now we can do the withdrawal in Mexi it has been enough time uh and right there let's go back here so uh again I'm going to grab this address and uh let's go ahead and execute that withdrawal so paste my address I'll just grab the address again here here here here and then select Network binance smart chain and now doing the same thing it's there you see so don't freak out you can put a little note of what it is you don't have to do that and then my favorite part is the fact that you don't have to do kyc

## **Pop Max | Comp Plan Training With CMO**

- nd activity So with that we have an amazing ecosystem on which we can build an amazing income And to help us understand the power of the comp plan I'm going to turn it over to our wonderful CMO where we can dive into the potentials and examples of what is possible here So Magnus thank you for your time Let's dive into what you have Thank you so much S And hello to everyone And of course s I have to say we I'm very proud to co c co-work with you because you are doing a great great job Your channel is very popular and a lot of people follow you and listen to your uh content So that is also helping this together uh like as I was saying mostly my job is to interpretate actually I

will pick the brain of the people behind and try to make it more understandable for us because the concept as I was saying is amazing they have so many things in place now it's up to us to actually grow our markets which is the western markets English speaking markets for example we have a huge potential here so absolutely let's go in and I will show you for example the compensation plan because it's very simple even though it looks more complicated So just let me see if I can share my screen here and I will try to by the way just give you a short examples Yes it's my favorite type of comp plan because in other types of comp plan it stops at a certain level and it may be seven levels 10 levels 15 levels 20 levels whatever it is but it stops With this kind of comp plan which is a uni-level differential you are rewarded to the infinite depth of your team based on your rank And so it really uh helps capitalize your effort and not get cut off And even when some people reach your same rank actually they've solved that problem as well Uh for those that reach a certain rank you will forever retain an over override on your team So it's a brilliant comp plan Exactly Sam I agree with you and even though it's like I said simply we need to make it understandable as well because sometimes you only get everything presented in one go people just look at it and say what is this so like you said I usually say this is an infinity unile breakaway plan with uh top-notch inside just to talk the first one that everyone has all active members meaning you have a

- sibility and the privilege of being at uh an incredible time at the frontier of taking something from the east to the west while seeing the potential being represented and the numbers being made because whatever language you speak that is USDT So uh you know it's it's a universal amount uh in in terms of numbers So the potential is immense I'm grateful to have kind of rediscovered this Um Magnus any closing thoughts about uh what people should be doing right now um to to get ahead before it starts to really pick up because once people in the English speaking market start breaking the thousand \$2,000 \$3,000 a day then it's going to be like what are you doing it's like well I told you about it exactly a month ago Uh the same thing So what what can people do now yeah first of all just to make a fact check is that actually I spoke to the company and asking for different numbers They say in today's actually 80% of all people that comes into Popmax choosing 360 days staking period So that also shows something that is actually sustainable is growing and is very powerful And back to the question regarding what people should do Well it's actually no big science What you need to do is to speak to more people take help take advantage of Sal's channel for example There's a lot of good contents in there We also do weekly meetings that we trying to emphasize and train people about different things But it's all about you This is all up to you what you want to do If you feel wow I want to do this I want to go to minimum \$1,000 a day Well then you need to start working And this is uh there's no easy way to reach the top but it's hard work but I guarantee you it's rewarding and you will love it That is one thing certain And of course uh as long as companies doing events if you have the chance go there because that's also where things happening in the event 80% of your all your time if you spend that on events or promoting events for example your results will be an amazing thing because yeah events is where magic happens that is very closing statement on that part Yeah well said Magnus and thank you for your time and wisdom Uh I can tell you this that I love waking up and looking at my back office seeing how the numbers from ye
- sterday's changed to today Whether it's the daily earnings um whether it's the um uh total team volume whether it's the number of people It's just a wonderful part of the day And I

spend the rest of the day trying to figure out how can I get this to more people And I think that right now whether regardless of where they start just getting people involved uh getting them in the system and allowing them to try it out even for \$100 will get them rolling into oh okay this is what the platform is this is what I earn this is what I can convert oh there's other things and let them you know get in where they fit in after that but just get as many people onto your team because as it blossoms as PPT may grow in terms of price as uh other other exciting things happen they're already positioned with then they'll come back and say "Oh okay I need to I need to 10x this I I was already in I was sleeping on this project Now I I can really excel." So thank you We look forward to having a lot more of these uh conversations with Magnus that are extremely helpful I was telling him it's because of someone like him that's bridging the field to the company that we now have a good representation of understanding and being able to kind of know what's happening with the company and uh he's been a wonderful um liaison that's allowing us to really excel And now I feel more confident than ever to put in the work here to be an example for many of what is possible here and I think we need the Roger Banister type of effect of seeing someone break the \$1,000 a day in the English speaking market And that whether you know I it's it's may not benefit you directly if for example I or Magnus did it but having someone that has done it and being able to use that person as a reference and to bring your people to that person to say look at that person let's hear from him let's let's see that he has done it and that will open up people's mind to say okay it's worth the effort effort here because I know someone is making And again because we don't have that in the English speaking market it is up to us to create those stories So thank you again Magnus and we'll catch you guys on these continuous weekly updates uh that Magnus does and I'll continue to uh

## **Pop Max | Daily Profit, Commissions & Node Bonus Withdraw Tutorial**

- always going to be \$90 or in this case per hundred dollar of PPT at whatever market value so I'm going to slide this and it's going to convert the P USD into PPT now when I go to assets it still says 90 but that 90 is not in the form of PD it's in the form of PPT which exists outside of the ecosystem I just have to get it to my bitg wallet how do I do that well PPT is not listed here until I import that token by clicking this little plus button and then pasting the uh contract address which you can uh find and I'll I'll put it in the description of this video as well and I'll put it in our team telegram as well so now it's been added and then you can uh see that it is somewhere down here maybe right there it's right there but the balance is zero until I execute the withdraw which I'm about to do right now maximum of 744 ppts so slide that over and then just confirm the transaction oh wait I need I need B uh BNB actually that's a very good point so I actually used my BNB uh to help someone else um so now I need B&B here so I'm going to transfer some BNB from one wallet to another wallet so I will just um that's a really good point so if you have opened up a brand new wallet you'll make sure to get some BNB there so I'm going to transfer from my metamask to over there uh let's just oh okay I'm going to switch that to let's say \$5 send confirm so you need that uh BNB as uh gas fee because it's on the BSC Network so when the BNB lands here then we're going to be able to proceed with the transaction and then we're going to uh import the or when we do the withdrawal for PBT it will land in what we've already uh imported the token address here and that is uh

what what gives us the freedom to then go ahead to those major exchanges such as bybit bitg Mexi gate Isle and others that uh are coming to the market that you can sell that on including panc pancake Swap and from that you have the freedom to either hold PPT uh either in your you know decentralized wallet or anywhere that you can hold PPT or you can right there so it just landed right there now we're going to uh do the withdrawal again and confirm okay and now now give it a minute or so as it as as it will get processed to um right there so the withdraw has been s

## **Pop Max | Earn Daily From Blockchain Social Media**

- different social media why it's interesting why people who are on Facebook Instagram Tik Tok would diversify into it what is their benefit what is the key features some of the highlights are that it has AI it has web 3 it has social F uh uh social Finance um embedded into it so those are some of the key aspects uh that that that this platform has and um right here I like no not this one right here I like the comparison chart that they have uh what does pop social have it has targeted audience uh it has user ownership oh um Angel uh is here it has uh social portability it has multiple chains nft ecosystem native token gameification reward develop or um platform as well as based protocol so a lot more to dive into there is a white paper that you can jump into and read all of that um which the aim by the CEO uh of of Pop social says we aim to decentralize the world's creativity the same way that ethereum decentralized the internet and that is Michael Shen there the CEO and this is his LinkedIn and uh this pop social LinkedIn so with that we have our wonderful CMO with us um and I will make her co-host and we also did another Zoom call which you can find on our team YouTube channel as well as in our team telegram um where you can uh view that recording uh which was um uh covering uh the the pop social side but this one we're going to be able to uh hear from her specifically about um the latest and greatest and at the end you can ask your own questions about the pop social side so with that um and are you able to hear oh there she is okay there you there you go wonderful thank you for guys lovely to have you here with us yours thank you so much for inviting me here uh first of all a big hello from my side good evening good morning from whever you are tuning us tuning in uh I'm so very excited to introduce you to pop social tell you about our team and what we are doing so let's start this so let me share my screen with you people uh yeah awesome awesome I love her energy and her enthusiasm and her knowledge about this platform so looking forward for you guys to meet her and and learn from her as well okay so um so we are talking about the internet's greatest Obsession that is social media you know social media is som
- d share which Facebook doesn't um you know Instagram doesn't and unless you're a big content theator uh you have that much of a incentive to to drive people to a social media platform um and I agree with some of the comments of of Having learned a lot more through your presentation of why um we're we're we're doing this and the space and the timing that we're in to be able to uh capitalize on this uh Facebook restricts me from monetizing my account because of uh the of fact Checkers not going to happen in pop social yeah it's a lot of those limitations that gets uh uplifted and and then you really feel your wings are able to spread and explore the true potential of a social media platform that gives you a lot more freedom and rights and control and um and and that's something

that being confined in these very rigid platforms where we're not empowered um where we can be silenced at any moment um you know it's really nice to go into something that uh doesn't have those vulnerabilities and those points of failures and if you see we are even giving you freedom from censorship you know the the Instagram or the other platforms that we use they just remove your content they just uh remove your content uh thinking I mean you don't know the reason they don't tell you that what is the reason they just say you you have exploited the the guidelines and we are removing it but with us you are getting full freedom from the censorship that's that's I think people will appreciate those kinds of um additional values right now I'm just doing the uh random number generator because of our raffle giveaways that we do uh so um the winning number for today was 419 and my team is already uh used to dropping a number in the chat so now we just have to find that why they're dropping the numbers and now oh yeah yeah yeah so I I I raffle away 300 ppts on each one of our Zoom calls so that's for three winners 100 PPT each so um now now we just have to find whoever the three closest are uh I'll I'll leave that up to you guys in the chat to find uh that I don't know if pepper is here with us on the zoom to find it for us but I'm here I'm checking she's checking okay so no worries but as as we're doing that hopefully this Zoom gave you a

## **Pop Max | Easy Step To Swap PPT To USDT**

- hey hey PopMax tribe you know it's serious when you put on the blue light blockers because I've been working into the night getting things going and boy has this sleeping giant been waking up this opportunity that we have been in but not really understanding the full gravity of it just to put things into perspective there are people in Asia making 1,000 2,000 3,000 4,000 5,000 plus dollars not per month not per week per day per day so there isn't any of those stories in the English-speaking market there are in Southeast Asia like Vietnam China South Korea uh those kind of places but where is the rest of the world where is our communities this is our opportunity to get into the game and start bringing our audience to be able to earn at some scale of those kind of numbers now there has been some things that have made it easier for our teams to start now engaging on a mass scale level you see to be able to earn in this web 3 AI social media platform that pays you to do what you're already doing on Facebook Tik Tok Instagram uh all these other social platforms which is launching soon um in order to onboard into that ecosystem where you can earn point4 to 1% a day 7 days a week 12 to 30% a month you can sell that appreciating token anytime and start as low as \$100 starting today and getting paid tomorrow you would need to go to any of these exchanges where their native token is listed and you would need to buy half your deposit amount in the form of their native token called PPT so that was kind of a friction point of many people not knowing where to buy it not knowing the steps or it was like you had to hop on Zoom to help your teammate to do that now that has been alleviated actually uh so now we can dive into these numbers of the different staking periods um which you can now do with 100% USDT beep 20 which is on the Binance Smart Chain so if you have \$100 there you can simply deposit the full 100 no longer needing 50 in USDT Binance Smart Chain and 50 in PPT then you can start staking and start earning now on the back end you would be getting paid uh in the what you ultimately withdraw is their native token called PBT

which you would then need to go back to these exchanges where it's listed and sell them so whic

- h is you know more steps uh which I have made a video uh talking about how to sell that on the NX1 exchange um if you need help setting that up reach out to your sponsor uh or or or me and um on on how to get that onto your phone as they're working on the desktop version so that is another point of okay well what do I do with PBT well you know you have to go through the steps of selling it something interesting has happened that I could not believe at first which is uh someone uh I was just checking up with him i was like "Hey uh are you are you uh selling your PPT do you need any help selling it let me know uh if you need help because uh you may not know where to sell it." So I reached out to him he's like "No I sold it." And I was like "Where did you sell it?" He's like "Um on uh I just did a swap on uh MetaMask." And I was like "But you you can't do that like you have to go to an exchange i mean like they don't even do that." So I was like "Send me some screenshots let me let me see what you're doing." And um he was very adamant i was like "No no you must have done something wrong this doesn't you can't do that like that's it's not even how would how would MetaMask even have you know uh like it's not listed there." So it was like you know it it was weird i I didn't understand it but then I tried it and it worked and so that's what we're going to try here together so uh welcome to my back office where now I'm averaging \$438 oh I got to sign in \$438 a day which if we do the math on that \$438 that's over \$3,000 a week which that is a good starting point but guess what that can be brought to 6 days 5 days 4 days 3 days 2 days one day and that's what I'm aiming for so anyway I have \$379 that I can withdraw so I'm going to go ahead and transfer to asset balance maximum there's a 10% conversion withdraw uh burning stuff there and then uh it's in the form of PUSD i'm going to convert that PUSD into PPT i'm getting 1626 PPT great and now I'm going to go here and I'm going to withdraw this \$314 in the form of PPT um you know it's it's what I like about this platform is that regardless of the price fluctuation of the token on the market you are getting paid we are getting paid in stable coin which is PUSD which is
- f input USDT output USDT you know then people will be like okay now I understand oh now there's an exchange uh I I can save on fees by doing it on the exchange while this is and remember I had no USDT so um if if USDT comes here oh it did right there right there usdt it just came from that swapping so you can see you can do it on BitGet uh and now we're going to try it on um uh MetaMask so I'm going to actually send some funds like let's say 100 uh I have uh zero PPT here so I'm going to send 100 uh PPT uh there and 100 here and then do the same thing on MetaMask as I know a lot of people are used to using MetaMask uh so you can do it in both places so uh again I have right here I do have I do have some Tether here because I did it earlier today so I have \$8.55 of Tether remember that and now we're going to do the swap of PPT right here to what usdt you can also do it to BNB if you need some BNB in your uh I'm going to do the max 100 and it's now searching fetching we are good to swap and here we go and uh it's doing the little swapping thing submit close okay so the little progress bar and it swap is complete close and remember it was \$8 and now it's \$28 of USDT so quite remarkable that this is even possible i did not know that until literally today and I wanted to get that out to you guys so that you can easily help your teammates convert and then of course in the future teach them the the exchange method but that's really really cool i want to also show you something very interesting which is numbers of growth it is remarkable what's happening

here uh the day before yesterday um my our team balance was 422,000 okay yesterday it was 432,000 grew by 10,000 today it's 446,000 which is like 14,000 more so in numbers not in words not in you know me saying oh good things are happening in numbers you can see that the team is growing money is starting to some good money some serious money some even bigger clients that are in the works of like 20K plus kind of clients are are in the works of u coming on board with POP because I think over time POP has proven like okay there there's substance here it's not just a staking model without any like backend infrastructure the fact that a they're listed on top tier three of

## **Pop Max | Ecosystem & Partnerships**

- first of all uh nice to be back i know last week we had um a travel coming up a little bit intensive so we could not be part of that uh leadership call but this week we are back home it was a two-day trip to uh Dubai and from uh Canada to the Dubai you should know there's one way 13 hours trip so that was really really hectic but it went good and we are back now home and we're gonna continue this week's leadership call all right I think we are ready to rock and roll and this week I want to present to you the big picture of PopMax Pop Social and everything around our glorious ecosystem all right let me move on to the first slide and we start by talking about Pop Social which is the core of everything now Popo is an AI driven reward-based web tree version of Tik Tok plus Telegram the social platform where engagement earns rewards and this is why this has become so much more popular than anything else and the reason is many but Pop Social is a global creative creator economy engine powered by AI and built on web 3 bridging Tik Tok style content with Telegram style communities and aiming to build a decentralized traffic empire for everyone and today around 4.5 billion people use social platforms they're spending an average of 2.5 hours every day but how many are actually making money from it That is not many people I can tell you because we all know that Tik Tok Facebook Instagram and all these they don't pay you anything to be there right but we're creating a lot of value to them so Pop Social is about turn every voice into an asset and reconstruct the power structure of social media which is of course powerful words but how we do that let me show you First let's talk about facts and statistics i see that my here I need to take away now i hope no one this gets disturbed all right so facts and statistics let's talk about Tik Tok all right tik Tok generated an estimated 23 billion revenue in 2024 and how they did that well 77% of percent of its revenue came from advertising but 23% coming from Tik Tok shops and that's astonishing 5.3 billion in in revenue and you have to remember they charge 0.6% transaction fees and then still made 5.3 billion in revenue tik Tok uh shops has become very very powerful i mean this is
- and where you can find the groups is here we have information updates and news you have a telegram on the left we have telegram groups uh if you have your phone or if you can take a screenshot whatever then you can get into that one We also have a WhatsApp channel and if you don't want to be seen or anything no worries no one can see anyone in there it's just a information channel We post out news and information about everything and both we're trying to post in the same both same time okay and uh with that I would say thank you so much for today uh it is uh time to move on we have a few more days of the promotion for the Gio Island so let's go for that and I hope to see you very soon but otherwise we see each other next Sunday have a blessed day everyone thank you so much

## **Pop Max | FREE Trip To South Korea Event KR**

- hey there PopMax tribe back with the latest and greatest to help us maximize PopMax for those of you guys that have been following along our journey from the beginning or you're just new to our tribe you can still look back at the journey from our past YouTube videos as well as posts made in our Telegram channel and Facebook group you may have noticed that in the past few weeks things have been growing exponentially and I'll share with you the open secret of exactly how that has been happening and what was a turning point in this sleeping giant of a hidden gem of an opportunity With that being said prior to the first PopMax event which happened in Vietnam my first time in Vietnam as well I was making about \$20 and something dollars per day and then by attending that event things began to change astronomically You see in the past few days I have now crossed \$52 the day after that crossed \$528 the day after that crossed \$563 By the way these are results that I'm posting on social media on a daily basis as well as in our team channels so feel free to use that to post as well as you can say someone on the team is making this kind of money but the reason why this has been happening is by immersing myself in that Vietnam event by being at the grounds of understanding the larger ecosystem of what was happening I got a bigger picture of that understanding that I was missing such as I didn't know when going to the event that uh I was going to be on stage but they needed a representative from the English markets and guess what i was I was the guy and so they're like uh could you get up there and say some things about your journey and there is me so uh not only did I get to learn a lot from these international leaders by which by the way they're making thousands of dollars per day but moreover I got a chance to put myself in a place of authority in a place of being on stage and so the reason I say this to you is because the next event is right around the corner it is not in Vietnam it is in South Korea on Guju Island the dates are June 4th to June 7th and these are the requirements to being fully compensated from flights to hotels to activities to inclusive everything you can either achieve this by 50,000 in personal dire
- ke business and vacation together hanging out with friends making money and of course making content there of showing your team that you're there which drives a lot more credibility which drives a lot more actions which drives a lot more volume that is the hidden gem of growing your team is by putting yourself in a place of authority of taking the action of taking the leap of taking the leadership to go and be there assessing it for yourself and making the content being the eyes and ears for your leaders that cannot make it there that is what's going to change the game and that's what I pride myself on doing that's why I'm all over the world is I try to be present the physical embodiment of as many of us that need the information and I go there with my little camera setup and things which by the way from the Vietnam event I had my tripod and I recorded uh a lot of videos that now you see on our team channel so that was you know thanks to me being there that I got those uh content for those of us that couldn't attend uh so it was very helpful both from my understanding and our team growth so imagine what it can do for you can completely change the trajectory of not just your PopMax journey but you as a team builder you as a leader in the industry It can change all of that by being in those environments where you can connect with other top-notch individuals from around the world and that's how you begin to create friendships and relationships and and and teams around the world because you are are in those kind of environments in those kind

of rooms in those kind of conversations and again this is fully compensated so it's not like you're paying extra for anything you're making the deposit in your account you're making let's say on the \$10,000 at 1% a day an extra \$100 a day and you also qualify for that full accommodations stuff so I think it's a wonderful win and a great driver for those \$10,000 deposits because even if you can't there's people you know that may be able to do that and they'll add more volume to your team b they will make a lot of money c they will get to go d they will come back with enthusiasm and fire which will fire up your team so a lot of strategy there make the effort the final calcu

### **Pop Max | Interview With Main VC Investor**

- mentioned I'll provide a lot more context in our group chats and continue to provide content that we can learn i'll try to bridge uh my access to Pony to you guys to give you guys the information that you need to understand why this is the place to be with that we'll catch you throughout the pop ecosystem puppet

### **Pop Max | Live \$2,000 Deposit | \$8k Total**

- cross uh per month for three months and then I can get my principal back if I want to a restake so with that I'm going to slide this um over here and it will be Min it's asking me to confirm on um on uh my uh wallet and then also you need some BNB for the transaction to go through and uh it's approving uh and it's minting a nft on which I'll be earning the daily um yield so just like that we are getting our nft minted in real time and uh then I'll have two success you see that there success um mint now Okay I think it's done already I'm just going to go to DAP here to just check on team uh see what the latest number is up here connect wallet bitet okay oh actually I might need to do this thing right here mint now okay um confirm and and then there should be a popup showing an nft has been minted ah there you go there you go quite the uh festivity right there view nft benefits okay um so it has some details it has a tracking number and now uh as you saw 6,000 right there uh now I'm going to go to Team now 8,000 so right there 8,000 uh so I've upgraded my my uh Holdings of of nfts uh or staking amount to 8,000 which is incredible I'm really uh happy to do that and and looking forward to Growing that more and more um other final details let's go to income um I can do withdrawals to take what is now still 1300 um that's in my Holdings there this is total earnings and that's how I can hold PPT in my wallet which on a separate video I'll show you how to liquidate that how to turn that into um what's known as you know like stable coins whatever stable coins you want usdt on on any chain so those are the fundamentals that I want to share with you on this particular uh brief demonstration of how to onboard yourself how to get involved in this opportunity how to start earning on a daily basis so that you are able to you know start realizing the yield and start collecting PP One area that we haven't really explored is just holding PPT for the value of that to increase as there's a lot of uh potential there but you can decide what you want to do you know liquidate half hold half liquidate all uh completely up to you I love the freedom of of the range of options so hop on to our daily Zoom calls where we're raffling away pp

### **Pop Max | Marketing Content & Japan Event**

- hey there PopMax tribe wanted to make you a quick update video in my really cool and I gotta say quite high quality pop shirt i wish I had a pop hat which I might have to make of my own that's not a bad idea okay you know what uh I'll get on that or my secretary will i wanted to show you guys this really cool flyer that I got from the Vietnamese event that happened just a few weeks back i'll take a high resolution picture of it and share it in our team telegram also there's a really cool event happening in Tokyo which I was almost maybe thinking about going there but I will be going to Japan for a different reason later next week uh which is going to be a first time country number 36 for me but I wanted to share the these pictures and read some of the very interesting things that I'm discovering about how big this ecosystem is uh for example right here where it says uh pop social uh wait right there right there right there um I I've already posted these in the team telegram so you guys can uh peruse it yourself but in case you don't um let me just share this with you right here pop Social is a social finance platform that seamlessly combines web 3 and AI to create a decentralized user first digital social ecosystem by leveraging blockchain and artificial intelligence we're redefining the creator economy and breaking free from the limitations of traditional platforms our goal is to empower every user to control their social identity and create creative journey in an open transparent and innovative environment how cool of a mission statement is that also here you see the ecosystems unlimited potential just some of their ecosystem you have PopMax a groundbreaking fund that propels economic model to new heights punkverse pop ecosystemdriven physical entities now listed on NASDAQ which is the US stock market pop uh X a fresh incubation fund designed to cultivate thriving ecosystem projects pop chain completing the full integration of the POP ecosystem driving PPT's growth so really cool there and then you have the um the POP uh right there global social hub expanding the pop ecosystem even further um the the world's first trendy toy web 3 financial economic model uh ecosystem which you can actually read what punk ve
- rse is over there and then NX1 which is a partnered exchange with POP's ecosystem oh oh this is the flyer wait is that the same flyer it is the same flyer oh okay okay cool cool so um that's cool uh I I I wish I could get this into the hands of each and every one of you guys because it is a really cool very informative flyer um so man man I should have been there in Japan this looks Yeah that's the flyer that's the flyer okay that's uh Okay cool cool so take a look at these uh content yourself you know it's really nice to see um not just the live uh interaction of our online platforms but this was a part of a bigger conference where POP was one of the guest um sponsors and and um part of a much bigger like web 3 uh conference so that's really really impressive uh not just that but take a look at just the fact that we're listed again is a huge selling point for those that are taking a fresh look at this opportunity it's like hey what makes your passive opportunity different it's listed on tier one exchanges two of these exchanges are amongst the top 10 exchanges and guess what they're working on Binance so do you want to wait until they get to Binance and then you're going to be behind or or do you want to get ahead of it like me and the other teammates are so I created these flyers which you can also find in our team telegram um easy to share on social media easy to post 10day staking opportunity get principal back after 10 days minimum \$100 earn point4% a daily 12% a month withdraw profits daily 4% plus principal back and there's an example of a \$100 \$1,000 and \$10,000 deposit and the yields across those 10 days and then you have uh this right here the 30 days same concept just the math on the 30-day which is 0.5% daily and then

the same for the 90-day staking 6% daily same for the 180day staking 8% daily and then we have the 360day most popular earn 1% daily and the mathematics on that uh also I've created this right here which summarizes u the concept web 3 AI social media platform that pays you to like comment and engage launching soon perhaps at the event uh in South Korea at the end of May um which you can actually go there um the qualifications will be released earn point4 to 1% daily 7 days a week 12% t

- o 30% monthly sell appreciating token anytime that's the PBT start for \$100 uh start today earn tomorrow already listed on these major exchanges and then um also we have this flyer which I really like it has a lot of the uh information of people that just want to know the numbers what's in it for me what can I earn what do I need to do all of that detail is right there and the possibilities they can instantly understand at a glance so very sharable piece of uh content here uh that you can easily post and pass around let's do a quick withdraw uh I have about 280 right there and again uh if you leave your PPT or your earnings there it in PUSD right there in the pool balance it earns you more income as PUSD gets into the pool from that 10% uh conversion fee or withdraw fee which I'm about to pay right now so this right here as I'm taking this out this fee of 10% 50% of that goes to the the pool of PUSD that pays out um the the uh 6 to 1.3% on your profits so you're making profits on profits uh that's really impressive and a hidden gem of this opportunity now I'm going to convert the B by the way by the way uh in case I didn't mention this on a recorded Zoom call um you can make now a deposit in as as a staking without having to withdraw the money into your wallet essentially you can compound without needing to do a full withdraw and restaking the way to do that uh is that you would need to initiate that first step and get PUSD and then as you'll see here you can change the USDT um to this rate oh that's the event in South Korea to PUSD and look it's registering that I have 252 PUSD now I need to pair that with PPT that I have inside of my back office which I don't have any PPT well I can take half of the 2527 wait wait what is that 25 yeah uh \$126 I think um and then I can swap that instead of doing max here we would just do half of it and then you would have some PPT here and then you can actually do the full staking from the internal earnings that you have in there so essentially we have three ways of staking one is um the normal uh the normal USDT with PPT secondly is just USDT if you click auto proportioning and then finally you have the PUSD and internal PPT here we're going to do a full withdrawal so I'm goi
- ng to do the swapping of a 100% just to show that and also I have to pay out some winnings of people from some giveaways that I'm doing on our Facebook group You can find the link to that in the description below of uh whether you post some things whether you post your results oh I got to sign in um into our Facebook group or post some of those flyers on your social media and share the link um yeah so so I'm incentivizing some ways that you can earn yourself some free PPT including your teammates because this opportunity deserves to get out there so now uh when you get back here it may still show the funds don't freak out don't get too excited uh it just um hasn't been sent yet okay so right here let's go to my wallet where I have zero PPTs and that should bump up to the one that I withdrew so in essence hopefully you guys see that there's a lot of activities happening both online offline we have daily or we have by the way speaking of daily um one of the best resources that we have right now is uh and this right here 1232 it landed right there as it does um this Zoom call that I did with the CMO of POP uh Max very powerful he is uh a great leader who's done massive things um and it was a very strategic

uh helpful overview that I learned a lot from so if you want to share the opportunity that first is the some of the infographics of like this or this or this or this or this or this um and then once once they are curious and they ask for more information send them this video and then then they can uh you know sign up with your link this one was also a great one that I really liked learning about the pop ecosystem on the social media side and then this one was the uh weekly update uh from Magnus that about the latest and greatest also very helpful so get your info together this has the opportunity to completely change our lives whatever you're making right now in pop 10x it 10x it to know what is possible here and would that change your life being able to earn that on a daily basis if the answer to that is yes then what's going to take you from where you are to that 10X is just getting this out there just sharing and delivering the the already produced content the flyers the video that I did with Magnus a

## Pop Max | New Feature! Stake USDT Only

- ll still show the balance once you refresh you'll see that it has uh actually left and and is on the way to is on the way to the wallet and there it is 1737 it has hit our wallet there now I'm going to go to Mexi which is where I like to do my conversion i'm going to make a deposit of PPT and send this amount all \$4327ish and that is on the way to Mexi uh for it to then be converted but in summary we have an opportunity that pays us uh each and every day and not only pays us this 1% uh up to um per day but also if you wanted to you can hold the PPT and sell it at your own pace um meaning you can look at the market and see when you want to sell it based on uh if if it's at a lower point you may not want to sell it at that time and once it increases you can sell at that meaning you can extract more value from your earnings by looking at the charts and and seeing when to hold PBT when to sell PBT but of course in the longer span of of the time frame it's done quite well it's done you know at least from even when I joined it's done 300% and that was two months ago so that's pretty it's pretty good uh let's go to see if it has landed here in the Mexi back office not yet so once it Oh by the way uh in our team telegram I'll upload a lot of other videos from the event so if you wanted to see what happened there as well as uh our CMO for Pop Social Angelie did a great uh like onstage presentation of the bigger ecosystem and so I got the email from Mexi saying that it landed so right here we'll see \$428 then I'm going to go to spot spot and sell it on the open market i literally have to be out of this hotel room in 28 minutes and get into a car for like a long three-hour drive to the airport so uh change this to it's already for me PPT but if you if it says uh something else change that to PPTUSDT so on that pair you want to sell and you can either type in the amount or you can slide this toggle here and you want to sell at the current market price sell and just like that it's been sold and uh now you can go to wallet and you can go to spot so whereas the balance was in PPT now the balance is in um right here it's in uh USDC I still have 17 PPT so I can actually sell that as well so I'll go to spot spot uh sell and m
- arket value maybe right here right there sell and that's also sold so now all my balance should be in PP uh in USDT right there and now I can go to wallet and withdraw and for that you'll need uh most likely we're going to withdraw in USDT you have to decide which chain of USDT you wanted the funds in i'm going to do back to my uh wallet here so I'm going to do um rece or this is the wallet actually but uh it's the same address right

here um ending in F8 so I'm going to paste that here it should automatically um well I guess I could select different networks but I'm going to do Binance Smart Chain and then you can select all here now if you see this don't freak out that just means you're doing the withdrawal very fast uh just give it another minute and it will populate so we're just going to refresh and do it again in about a minute's time u but this is the POP the introduction to the POP ecosystem uh really it has a lot more layers to it a lot bigger than I thought it was um it has a lot of different um elements to it not just the staking alone so uh it it's really prevalent in Asia and I think that's because of a language barrier that's because of their focus has been predominantly uh Asian market um and so because of not knowing what it is that we have our hands on we are uh I really like this picture um we we're missing out on on understanding the big scope of what this is um so like like this right here you know like the board yacht club I it was unknown until it became really big and and it's something like this uh where it's like okay what exactly is this and then it becomes uh really uh viral and interesting and and you know like what if PPT gets to some substantial amount and uh which already it's it's done you know decent enough 300% in two months is quite wild okay so here Binance Smart Chain select all submit you don't have to do KYC and uh and then it will send me an email with a code you have to click get get code actually right And uh there it is there's my code 0937 68 and then Google authenticator 840 9992 and it is on the way You can track the order here This is uh what I just requested from the Mexi uh pending progress of \$418 before that I did \$331 that process successfully uh \$318 here uh \$

- 225 here \$411 here and uh that's just a few of them if we go to even earlier let's go back here here oh that's years oh my gosh oh my gosh okay uh Febru Okay right here february we start here okay so I did uh 418 these numbers uh 411 6 and 21 422 395 231 414 and so on and so on uh 20 2011 198 379 58 8,116 um 100 uh all of these 1500 uh 158 and so many more so many more and so just goes to show uh the flow of the funds is quite liquid and there it is 418 just landed into my BitGet wallet uh there it is right there 418 so you saw the whole conversion of a withdrawal to my uh bitget uh and then I sent it to an exchange like Mexi doesn't have to be Mexi it can be any of these exchanges by bit uh gate.io all those uh there that you can convert it on but there you go you saw a summary of uh some of the details of the event a lot more of the actual content to be uploaded onto uh YouTube and and shared on Facebook and Telegram but uh may want to pay attention to this platform uh more so because it is it is uh like I said bigger than I thought and bigger than we know um a lot more to discover about it and uh there will be a lot more zooms with many different uh individuals from the company side um from the CMO to uh of of Pop Social again to CMO of PopMax and uh many other uh top leaders and um information from the company side to help us understand where this is headed and it seems to be a growing direction so grateful to be a part of it grateful to have been invited to Vietnam and gotten the chance to talk on stage which if you want to see a clip of that it's already on YouTube um which was quite an experience to speak in front of people that didn't even know English uh enough so first time doing that but uh grateful for all of it with that guys we'll catch you on our continued growth to make the most to gift back the most i will catch you next time for wherever else around the world peace

- how many of you would like to make a lot more money in your life how about a lot more happiness in your life how about a lot more of both in your life yeah well you're in the perfect place as we shared earlier today with all the information being shared it has been an opportunity for you to take advantage of so how many of you are going to take advantage of the opportunity with what we have here today to have more success by a show of hands thank you well my name is Ruben Martha i'm an international speaker trader and published author and today we'll be sharing some information on how the NFTTs are emerging and evolutionizing in the world of DeFi one more time so as we shared I do trainings all over the world on personal development i do trainings with Robert Kiosaki the rich dad poor dad are you familiar with him yes okay i do trainings with him we do trainings all over the world in regards to mindset development because as you understand when you have an opportunity that's great but what's most important is having the correct mindset would you agree yes so that's what we're bringing here is the correct mindset with the opportunity with pop social now as this is in with Harve T Harve this was in Brazil we had 2,000 people there and also this is what we're going to be discussing because the time is brief i only have a short minutes of time so we're going to take advantage of that minute so how NFTTS are being shaping the future of the decentralized finance it's amazing how the market is changing how when it first started out it was in the early days of NFTTS in 2017 when all this came out about NFTTS it's like what is it i don't know right we had that understanding of I I don't know we got to find out more but it started with the crypto punks and the cryptokitties some amazing information and also the introduction of all what we know now is the theory of ERC 721 standard and digital assets but how many of you after you heard this about NFTTS there was a little frustration sat in or you felt like this or we didn't know it's like I don't know i don't know but it's okay that's why we're here to guide you in information that you don't know for you to have more success or was it like this right frustration what ended up you wanting to do this like get away from it right i don't care i don't want to know but the great thing is you're here and you have the opportunity to take advantage of it so the mainstream adaption to the market it's the rise of the marketplace like the OpenC and Rarable Foundation and here's the great thing about what's going on when the celebrities got involved when all of a sudden these musicians and the artists started utilizing and leveraging the NFTTS so there's opportunity there for you to see where else is going and also the NFT backloss this is where we're going with this as far as more information for you to have that you came here invested your time you're investing your time now to be here because the information that you're going to take away when you go outside those doors you apply that information and you'll be able to have more success so here we go the fractionalized NFTTs for shared ownership the NFT staking for earn rewards and also here we have the innovation in utilities the crosschain interoperability and the broader usage which means more opportunity now some of you already may know this information we understand that but we're going over it once again because the repetition creates mastery the more you practice something the more you tend to do it when you like it and when you're generating a lot of money from doing it you tend to like it so that's where we're going with this and the challenges and risk which all investments have risk we understand that but the goal is to minimize the risk when you invest your money because the market volatility and the speculative nature and the uncertainty of what we're doing is like I shared with the resists and also the security concerns because there's a lot

of things going on there's a lot of people that are getting involved with your with your accounts and things like that that were taking ownership as far as seeing and minimizing the fraud as far as your ability to be exposed but here we have special systems that will handle that as well and in conclusion because I have short period of time is the NFTs are moving beyond collectibles into functional financial assets that will allow you to leverage even in more industries than there already are now and the role in DeFi is growing through loans staking governance and tokenized and world assets so with that and yes you leave and you feel a lot lighter because you have an understanding of what was shared today how you're going to apply it like I share once again in your life this is what you're going to feel like there you go so say pop social pop social there you go thank you very much and enjoy all your success our time

## **Pop Max | South Korea Form Tutorial KR**

- hey there PopMax leadership i wanted to make those of you guys that have qualified for the second international PopMax event this one happening in Guju Island in South Korea should be a spectacular event with over 700 people i was fortunate enough to attend the very first one in Vietnam about less than two months ago where I got this cool shirt and some amazing footages of that experience captured and shared with you guys on our Facebook as well as team as you can see um it it gave me a really rich understanding of the possibilities here and the big ocean of markets that are untapped including giving me a better understanding of the ecosystem that is here it was somewhat of a sleeping giant for the rest of us in the non-Asian markets um until that event and from the content of that event that I captured witnessed as well as uh you know communicated um from there to the rest of the team has led to an explosion of our growth in our teams um and I think the numbers are evident as uh most likely tomorrow I'll be crossing \$700 per day now the uh qualifications uh were amongst these three options here to get yourself free flights and accommodations which are that you need to um either stake \$10,000 or have a certain amount of team volume um I think it's right here yeah there it is um achieve \$50 to \$100,000 in new personal community performance uh starting from April that was April 20th I think you could stake \$10,000 yourself in the 180day or 360day time frame or you can do total team performance whereas number one is direct this is more of a total team um and uh that's on your lesser leg needing 150,000 in total team volume would get you uh that accommodations for you now if you've met those qualifications then there is a link this one right here which I will also put in the description of this video as well as it's already in our team telegram um go ahead and fill this out now initially when you click on it you'll see some uh not so English characters um you can still try to proceed with you know with what you see there or if you're on your computer you can rightclick and translate to English and some of that will be then converted into English so team name um I believe we belong in the ACCE international all
- his month essentially within two days uh no registration accepted after this date for inquiries contact official support which is 999 the number99 the number99 on Telegram um so again PopMax it should say South Korea but it says just Korea Summit i guess it's evident that it's south not North uh registration now open date June 4th to June 7th location Guju Island South Korea there it is um global pop ecosystem pioneers will gather in Guju for a groundbreaking AI web plus web 3 event oh man that's exciting can't

wait to see because because we learn so much we get to mastermind with the master distributor Magnus is going to be there this is going to cause a huge growth of of um our our team uh after this event um being there in person will definitely do a lot for your understanding and your impact with your team registration is now open limited spots available i think there's going to be like 6 to 700 people maybe possibly more registration details eligibility confirm with your team leader whether you meet the uh meet the participation criteria deposit some a 1,000 PPT deposit full refund within 3 days after the event that that 1,000 PPT you're going to get that back after you attend the event within 3 days which is by the way like \$2 like 6070 right now based on PPT price note if you cancel your uh for any personal reason the deposit will not be refunded which is you know it's fair in terms of the what the company's paying for and whatnot so it's a small little deposit there so uh there's various links uh to different languages of course we're doing the English one and again the deadline stuff like that so um let's get this done uh whether you qualify whether someone on your team qualifies whether you qualify and you can't go you can give that seat to someone else um the difference is they would fill out all the information there and where it says the wallet qualification um that that would be just your wallet there instead of their wallet so like right here where it says uh platform wallet address audit performance that would be your wallet that you're giving to one of your leaders that would be able to go and the rest of the information would be theirs and then either they or you would send the uh 1,000 PPT he

- re and then the wallet address where that 1,00 PPT is to be returned right there if you need any help with any of these steps you can reach out to this guy right here and uh he should help you out to get this up and completed and submitted within the next 36 hours or so so we have to take action on this immediately for those that qualify and again if you qualify and you can't go figure out a way to get one of your teammates that could be a representative for you and your team to go on your behalf don't waste that seat um it could be transformational for that person which happens to be on your team and thus transformational for you as well and you have some eyes and ears on the ground that you can communicate with this is a great strategy if by chance you qualify and there's a potential big leader that you're talking to and says "Hey I got this seat i can't go i but I qualified would you like a free trip to South Korea to mastermind with?" And and of course you can connect them with me i'll I'll I'll you know have deeper conversations with them when I'm there but I'm just saying if you if you qualify figure out someone that you can send as a representative um or if you qualify uh uh other people on your team also qualifies either make sure they go or they send a representative Let's maximize the seats that we have going to this event because each one will come back and be a very strong advocate and and and uh ambassador on your team to grow in a way that someone who didn't go uh may not be as fired up to to make the kind of uh impact in your team as those that do go as we know events change lives and that's why I try to attend as all of them even even the ones that might not be for me like in a different language or or not for my team but if I can if I can get there I'd love to grow with um those kinds of energies and those kind of a caliber of people so with that uh get this done let me know if you need any help send me screenshots of wherever you might be stuck send me questions of what whatever you might have little confusions on but get this submitted not tomorrow today right now uh because you might miss that window and that's going to that's going to cost you dearly a completely free uh work vacation to So

## Pop Max | Team Launch Presentation & Live Withdraw

- selling or you can slide this toggle all the way to the end and it's going to be 2,700 and um 58 sell PPT and um if you get this then just that just means you need to do two transaction maybe um and then let's go to wallets and spot and see what now my balance is in the form of usdt um on in um in in the exchange Now I can go ahead and execute a withdraw which um you don't need to do kyc but you do need to do Google Authenticator which is a validation app and it will send you your uh code there now if I go to uh grab my address from bitet right there uh I will send it there to show you it going back to the same wallet um but you could send it to any wallet uh I'm choosing the binance smart chain on usdt select all now if you see this zero right here that just means you need to give it a few more minutes for the system to up update don't freak out it says 621 there it just needs to like update internally but in the meantime let me show you what I was going to show you on Telegram in our team Channel where I have a lot of information including an interview I did with the venture capitalist uh here are some of the other activities that's happening in different parts of Asia meetings and presentations um office get togethers uh I was this is the price at 18 cents and now it's already at 20 this was when it was at 15 cents lot of activities so this is just new to the um well it just officially opened up on January 20th of this year um but it is just making its way into the English-speaking market and that's where our 13 that's where yeah so lot more to explore here know uh you guys can dive in there and see a bunch of content around what's happening around the world so let's go back here I'm going to refresh and I'm going to execute the withdraw again uh we do that by selecting which crypto you want to with well it's in usdt um but which usdt chain you want um right here I'm going to do binance smart chain select all now we see the 621 you can put a comment there but that's just for you and then over here I'm it's going to ask me to do a um email verification and then a Google authentication so I'm going to get the code in my email right now and I'm showing you the full process of a live withdrawal live conversion u
- m so you understand how simple it is and the fact that you can um do this anytime yourself whenever you have earnings in the back office now submit and it is on the way You can track your status here and uh this one says pending progress uh pending processing it's 621 um to this wallet address yeah yeah so a lot more transactions uh 231 433 2011 198 397 58 80 now if we go to my wallet right here um we see that I have no usdt so we're going to see about \$600 of usdt come into this wallet from the Mexi exchange where I converted the token of the platform PPT sold it for USD on the binance smart chain and now bringing it here this is a real ecosystem where you can see exactly what's happening to the money and you have we have the freedom if I didn't want to sell it at that time I didn't have to I could have held on to it because the potential of this could be much higher it's 23 cents someday it might be 30 cents or 40 cents or 50 cents or a dollar and so I have the freedom to sell whenever I wish which is uh great um because then you can decide for yourself so um once that lands we'll see this balance updating but the main summary is that we have a passive opportunity with a really big e system that allows us to earn each and every day oh look 621 just landed in the wallet um there you go I have now \$621 of USD ke that I could do anything I want with that um and it say it's literally I just did this in real time on this Zoom so you can see from withdrawal to conversion to in my wallet um and and that's how people are earning around the world

anyway that gives you a good summary of the main bullet points there's big things happening in fact on the 28th literally in three days um there's an event happening in Vietnam for which I will be going there to it's the first International Event first English event um and uh there's going to be many announcements at that uh event that that I'm going to record and get to you guys but um this is just getting off the ground thank you thank you very much s that was a very wonderful presentation about this particular company guys I I think you've heard everything he said the the main thing you really need to uh pick from this is this is not just um your regular project

- ke advantage of it right now you're going to be so amazed at how much you can be able to generate in three four five six months from now like do you even understand that with this project you don't need to even recruit anybody you don't need to bring anybody you just take as little as \$100 for 360 days and you are making 1% daily from the stake right this is not your regular investment platform for most of us who are into crypto we know we we know about liquidity pools this is a normal thing that buybid binance they do I have been I have participated in a lot of liquidity pools this particular project do 50 50% uh \$50 if you if you're going to be registering with \$100 you have to divide that by two meaning that you need to buy the token the P token which is the native token you need to buy that \$50 and you buy um usdt \$50 so you are actually putting it into the liquidity pool so this is not some Forex investment platform that is telling you we're going to pay you 1.6 we're going to do what I mean everybody knows that trading is nothing guaranteed this has nothing to do with trading right this is something that is guaranteed to pay you for a very very long time so this these are just some of the points that I wanted to reiterate um um sales testimonials sales withdrawals all of this was done life so that you see that we're not talking about audio money here because some of you might think that this is audio money it's not audio money it's video money so that you can understand I don't want to go further than this because we're trying to keep this as short possible but I just wanted to make sure that the main points um of the presentation that at least I took from the presentation and I really wanted to be emphasized um I did that so um we're going to get more of this I'm going to also beg s to do a a video of registration so that we can all have that and know how we can be able to get kid into this as quickly as possible and for those people who do not have crypto knowledge before you don't have to bother because we're going to train you guys we're going to educate everybody on how to get a bybit account personally I do not like stress so I'm not going to come and say oh I want to buy PPT for you or something I'm
- m going to teach you how to use buybit you're going to download your buybit wallet for those people who don't know anything about crypto before I'm going to do that for free for you so that you can be able to own your business yourself you don't need to necessarily contact your plan whoever is going to refer you into this you can just quickly get on board because this is not something that you want to drag your feet on so with that being said thank you so much s for this amazing opportunity I would always say thank you because this opportunity is coming at such a time as this and um one thing I can assure you is that the Nigerian team we going to explode this it is going to be explosive and I'm sure that as I'm talking people are actually listening and they are already calculating Nigerians they are very calculative so in another video um we're going to I I personally will be able to take you guys through on for those people who are interested we didn't just want to make this video about referrals so that people who are not

interested in referrals think that it's only when you refer because with this platform whether you refer you don't refer you will make at least 0.4% depending on the amount of days that you are obviously invested into this so this has nothing to do with just referring but for those people who um find Joy like me in telling people about um platforms that I'm really interested and excited about we're going to share more on how the refel system works so we can know how we can collectively um how we can collectively um leverage on that because there is so much money actually actually there's too much money in the referral program and you cannot believe how much you're going to make I've said this before thank you very much s and I'm really grateful for this opportunity uh and you guys can start today and test it out and see for yourself uh for as little as \$100 explore the ecosystem because this is not something that is like a a one trick pony or just like a passive um you know trading something it has substance it has depth it has utility it has a ecosystem it has a social media side it has even bigger plans in fact one of the things that I I talked about with the VC is is kind of their their

## **Pop Max | WOW \$502 Per Day!**

- you that are looking at this for the first time and were just clicking on it because you saw that someone's making \$500 a day uh let me introduce you to a hidden gem of an opportunity where you can earn 27% a month the minimum to get started is just \$100 of staking you can earn each and every day of the week without needing to refer anyone you can withdraw multiple times a day you get your withdrawal instantly under a minute no one needs to approve your withdrawal you get your principal back at the end of the term the terms can be as little as 10 days to as much as 360 days and there is a matching check referral program which pays you every day that your teammates get paid of course I've done full in-depth presentation that you can find on our channel this is very important and I want to invite any serious leader to come join me at the second international PopMax event this one the first one was in Vietnam you guys saw I went there and and made some content here i want to take as many of you guys as possible or any of your teammates to this event happening from June 4th to June 7th in not just South Korea but Juju Island which is a spectacular place and what I love about these uh PopMax events is it's not just conferences and meetings but actually they take you out into the country and show you the landscapes and it's just really beautiful experience to see the country as well and here's the eligibility uh either you can do some personal directs or uh team volumes which is number three but number two is what actually so far like seven different people on on on our team have qualified through by just making a \$10,000 staking for 180 to 360 days i think 80% of people as as Magnus said is doing the 360day staking it that makes the most amount of sense and al and dollars um but also um this needs to be done from April 20th to May 20th so that's the time frame in which any of these requirements have to be made and then we have a bunch of this stuff that I covered in so many other videos you can review those stuff and the price the price of PBT have you been keeping an eye on that that has been incredible uh the latest numbers okay let's just refresh uh 22 cents 23 cents almost 24 cents when we got in those of us tha
- of the major bullet points of this you can also find this at our team telegram this is one of my favorites as well summarizes a lot uh these are the numbers this is the kind of credibility of it being listed on these major exchanges uh this is our YouTube channel um

which I really like um the the fact that we have so much wonderful content other teams are using our content and I'm I'm so proud of that that they find value in it that they're sharing it and and using it and I'm grateful to have such a um you know ability to distill the information and make valuable content that gets shared and helps other people make money we're all in this together pop family worldwide um I'm grateful that that we're all winning together okay so another big thing team volume our team volume has crossed over half a million dollars which my goodness did that take effort did that but now I'm seeing actually you know what's crazy yesterday it crossed \$500,000 yesterday I think I ended the day with \$56,000 today it's \$521,000 so an additional \$15,000 i don't even know where that money came from by the way like in the beginning I was like okay I knew who was making the deposits and I knew was coming now it's happening without me knowing where such 10,000 5,000 uh boosts are coming from so it's things are happening uh let's see what the latest numbers are 462 right there um 516 it was 4 uh 62 now it's 516 so So like it's my goodness it's awesome oh another cool thing one of you on our team messaged me saying "SPT is on Coinbase perhaps soon it will be available to buy itself." I don't know if it's available for trading yet but but there are some details on it on Coin uh base so that was pretty interesting she sent me the screenshots and here they are and there's also the link which I'll put in our team telegram as well i want to end with just invitation to this get your butt to South Korea by the way they will compensate full flight round ticket flight from wherever you are in the world plus hotel stay so other than buying stuff uh and and most likely with the hotel say you have uh inclusive breakfast uh but they really take care of their people and I really enjoyed that

- going to Vietnam so I highly recommend getting yourself or some of your teammates to this event it will change the trajectory of your experience both on a personal level and on an income level with Pop Max i'm extremely honored to present this to you guys and hopefully you're seeing it through not just words but numbers in your own back office and as a collective and soon we'll see a lot of people buzzing with pop and saying "Oh did you hear about POP?" And you're like "I'm already in POP i've been in POP for the past several months." Um and so right now a lot of the people and and by the way a great strategy that I utilize is I drop in my income like a screenshot of that into a lot of the people I know that are in our space into their inbox uh if they're open to taking a look and then I follow up like few days later with uh an updated amount so if if you're starting to like gain a few dollars every few days in terms of income like right now \$500 and \$2 both you can use this like somebody on the team is making \$500 a day and I will go back to a lot of the people that I messaged where last time I was making \$460 something dollar that I had taken a screenshot and put it in their inbox and now when I come back and drop the 500 they were like it's growing and then I come back like a week later it's 550 and then another week at 600 or whatever it'll pay attention so use such a strategy where you're updating and dripping the progress of you teammates my results feel free to do that as we are growing this together i'm extremely honored and grateful that we are starting to get the traction and momentum and that's going to be a gamechanger for all of us as I say the rising tide raises all ships and we're all rising together here with pop hop into our communities on Facebook where every single day we're giving away free PPT uh and also in Telegram uh there's different promotions that I'm running to give away PPT as well so uh hop in there and do the things that I'm saying for the free PBTs uh like making

a quick video of what you like most about uh pop your pop experience and send that to me on Telegram and uh get yourself 100 PBT so that's running right now so feel free to message that video to me in Telegram f

## **Pop Max | Weekly Update On Comp Plan/ Nxone/ Partnerships**

- understand that this is really good we are together building the future so thank you everyone for taking your time this is going to be a recording so we'll put it out

## **Pop Social | \$40,000,000 With 500,000 Users**

- something I invite all of you to be a part of our pop ecosystem so that we can build something that people will remember for the years to come because enough of being the victim of centralized social media It's the time that we realize that what social networks can be beyond these limits beyond these gatekeepers beyond these people who are using the users as as as the profit makers but not giving us the profit They are using our content they're using our data they're using our identity and we are getting nothing So let's let's create history together and you all are invited to be a part of the pop ecosystem Yeah And I'm really glad to be here once again with all of you sharing you guys what we are doing And thank you so much S for for inviting me here and I'll always be very much interested to be here No Wow That was uh I know I wrote down some very very important points for myself uh because this to me was even more exciting than the comp plan and the reward system because it shows a much bigger picture of the ecosystem of what's possible here and where we are in the early stages of the new era of um moving into uh uh new social media and combining as you said web 3 with Wall street and those kind of innovations we have here So um I wanted to cover a few final points of um what it is that we have in front of us because we are at the right place at the right time and uh I'm really really grateful um to be a part of it I actually didn't know the magnitude of what we had in front of us when I joined um in in the beginning stages of uh allowing us to um stake uh which is still within its first few uh months um I don't think it's been 90 days even of of when that started on January 20th and slowly I have been getting more of the understanding and information of how grand this can be just thinking about one piece of it landing on the because it's so many different parts from Pop Social to Pop Max to pop burst to Pop X uh um and just and a lot more partnerships um to come So when we think about the 200 million supply when we think about half of that will be burned through burning and every time we make a staking 10% of the PPT we're using is going into a black hole wallet that it can never be retrieved from When you t

## **Pop Social | Web3 BlockChain Social Media Pays You Daily!**

- s that shows that we are a user driven ecosystem and that how much we prioritize our users yeah and this is our road map so we uh we have already um introduced did that is a decentralized identity RS verifi verifiable reputation system it is already working it has been introduced uh White list is done great testing has already begun in the 2025 quarter 1 We will be officially launching the actual version of our pop social application and it will be listed on app store for iOS users and Google Play for the Android users Then our

AI generated content functionality will also be integrated multichain asset develop de uh deployment will be enabled and in the quarter two we will be uh listing the PPT on binance which is a big deal right and then there will be content tokenization and NF issu these functions will also be live by the quarter two of 2025 and then there's more to come that will be revealed with time and this is our vision for the future over million users are expected to join the platform and I hope it will be achieved soon and then we have this Revenue Target of 1.5 billion dollar it's like shut and revenue so if you are someone who want to be a part of it please join our communities please uh give your feedback to us so that we can improve and this is something really serious guys we High time that we the creators need to have the control of our data and we are doing that through pop social awesome you know I actually learned so much from your presentation because I tend to just go into the fact that they've been listed and how we can earn from their ecosystem but all of the foundational work that you've shown here uh which goes to show that there's a big shift happening in content ownership and and how there's now a new set of uh social media platforms that is inv involving the participants involving the content creators such as you and I into their revenue streams is what's really changing um the industry and so I'm really proud to have something that uh is doing that because we we uh are living in the blockchain era we're living in the web 3 space and it's like our social media hasn't updated Facebook and Instagram and Tik Tok they haven't updated to all of the new aspects that the blockchain brings

### TGT Vlog #1: From \$3.7M To Starting Over

- then hopefully uh more of the globe so it all starts from here right now in these uh in the sweatpants um of these one-to-one interviews and assembling the right team and the right engine for a lot of content creation and spreading of Goodwill and good philosophies okay okay so what I'm wanting to do is a daily Vlog of many things from travel to business to NGO and so I need a team from him to other people um from pictures different angles editing um behind the scenes and all that stuff so welcome to my bedroom don't mind the pink pillows uh it's not something I control whatever is clean the maids put on this is the unpacking of me arriving uh last night literally like uh midnight from the Philippines to check out an investment business opportunity and talk to an old friend of mine who's actually the owner of the company right now I'm repacking because I need some space some peace uh to to go and concentrate on rebuilding so much but my mom and my cousin are here to visit and as much as I love them I need my own space and so as opposed to telling them to leave I'm going to a hotel for the night literally like two blocks away just so I can concentrate and work optimally foreign foreign foreign welcome to my staycation right next door to where I live it's not an impressive room I'm not here to flatter you with the five-star glamor uh right now I am in a firestorm of thoughts and um internal crisis that I'm having to uh deal with the title of this video is not too far-fetched in fact uh I have for the first time my life after 2013 when I dropped out of medical school to 2023 when I finally crossed multiple seven figures officially earned the title of multi-millionaire was it something that is evading me um multiple millions of dollars that I have that I cannot access which was funding my life in terms of multiple six or six figures a month to no income at all um I am literally down to let me give you a specific number of everything I have right now uh in liquid form 15 150 is what I have in

hand to rebuild my Empire rebuild myself and it's a beautiful time where I'm having to tap into everything that I have built up in terms of my character resilience dedication perseverance and all of those characteristics are ne

- eding to come out right now yes I do know the path to seven figures um but it's it's something that I uh you never wanted to restart but when faced with it there's no time to lament or grieve although it is not necessarily over with that multiple seven figures I just don't have access to it I don't know what's happening with it and I can you know put in the effort and time energy down a path that I don't control or begin to build new income and that is why I've isolated myself in this staycation to work very very focused with my secretary and all the clients and coming back from the Philippines with a means by which to begin the Journey of rebuilding and that is what we're going to be working on right now foreign world where we do a lot of business via text message and uh you know try to get to know the other person across the screen across the ocean of the internet one of the things that I've noticed that leaves a deep impression amongst my friends my clients and the people that I do business with is the Personal Touch of not just voice note but going ahead and making a personal video to them to say hey Chris hey John hey Jamie just wanted to let you know this and that and that little extra 30 seconds to a minute Bridges a huge gap of who am I doing business with the personalization of these sorts of packets of communication becomes a lot more deep and that is what I'm diving into what has worked for me these extra going these extra steps and these extra miles tapping into the roots of what got me to the multiple seven figures going back to those days of like 100 plus video messages a day builds the pipeline of tremendous amounts of business with friends around the world foreign working on Zoom with my secretary pepper on these clients and trying to get the opportunity that I have discovered by going to the Philippines out to my International clients around the world that are curious about how to put that opportunity to use as I have at that I'm doing my for myself I'm also in the midst of this I had a in-person meeting with my female trainer who is also stepping up to become my uh kind of uh in person guardian of my space and my peace and and making my life into an orderly routine guarding me from distraction

## TGT Vlog #2: Back At Sal Mahal

- back at the Salmon Hill after a day of a staycation very nearby where I got a chance to reconfigure my mental framework and set a new precipice with which to concentrate and now I can carry that momentum continuously here at the time whenever I need a reset to step out of my environment and then reconfigure come back and hit it hard thank you foreign foreign you're doing annotations Angelo yeah I I screwed up on the computer no it's okay yeah okay uh I'm just trying to copy and paste the address yeah yeah it's all good so it's currently uh 8 45 p.m after what feels like a day and a half of activities especially doing leg day but I'm happy to say that while it's a incremental step have made about twenty eight hundred dollars within the past 24 hours of getting a new business venture the one that I went to the Philippines and had the Deep discussions on uh through my Sweat Equity efforts and hopping on these Zoom calls in fact I have another Zoom call in 15 minutes and not to mention that I have to make a social media post talk to my groups handle the inbox talk to the VIP support talk to existing clients it's just a whirlwind of things that I barely uh remember to eat let alone sleep so so it is an interesting time in my

day-to-day activities um in the midst of that trying to also shoot this content for who knows what but it is something that I'm wanting to remember and wanting to share about how I went from nothing to something to nothing to something and nothing to something to now rebuilding in a very uh sustainable way in a way that I truly enjoy it and not feel like I'm on shaky grounds and this is the Journey of that I'll catch you tomorrow with more wildness of of what it takes behind the scenes this is not the glitz and glamor right now I'm exhausted but I'm still like trying to push through trying to take micro naps in between these Zoom calls I'm literally on mute right now while helping a client sign up for a high ticket service and then uh it's it's a beautiful start you know it's kind of the feeling of going to bed extremely exhausted but proud of the day's work it's that and I hope to do a series of that and I know that that will lay the bricks of rebuilding my Empire I'll catch you tomorrow peace

## The 5 Daily C's To Building Momentum

- working out and and those things of just putting in the hours your body and your mind begins to look for uh simpler ways better more effective strategies and you pick up things from this worked this didn't work this is something that I I need to change um what else are are other people doing that sort of uh adjustment happens when we show up and put in the work day in day out second C circulation is vital uh just like the blood in our body uh this is as vital as that because if you create a piece of content and you don't get it circulated it sits there the value doesn't get appreciated it's like gold that doesn't get minded out of the Earth or no one gets to uh see it or appreciate it step number one um multiplatform publication meaning don't just keep your content in one platform get it out there to a multitude of different platforms
- tribe which is a mission of making the most to gift back the most it's to you guys both in money opportunities information like this um as well as offline giving back that you can see some of that on our YouTube channel there's actually a lot more that is planned um two more charity events that I have done the videos of that are being edited and after that I will do even more almost on a every few weeks basis I invite you to join the tribe on Facebook as well as our VIP telegram Channel a lot of giveaways bonuses early heads up on opportunities uh this is how you can reach me by scanning this QR code on telegram where just by entering that telegram you get a \$10 gift um and from there I do Raffles in the telegram Channel and um since since we already have your USD trc20 deposit address

## The Greatest Project I Found

- not you're going to absorb it yourself um that's up to you uh you know as they say when the when the student is ready the teacher appears that means whenever you want to learn you'll find the resources around you I am just one person that's trying to share my journey of what I am going through and going growing through but in regards to you uh I will share the distillation of my knowledge that I absorb through uh daily practices of sitting and absorbing digesting them and Distilling them into practical steps in my own life and as a way of driving those deeper into my brain I will teach them to you uh if you decide to take advantage of that you can if not at I'm doing it for my own growth uh you know

teaching is one of the highest forms of learning which is kind of interesting um that you learn through teaching and so uh more than I'm spending time in front of the screen uh of my laptop or phones I'm actually spending more time in these other Realms of my growth uh reading absorbing uh studying um opening myself up to New Dimensions of growth uh i' I've wanted to study AI which can open up so much uh other tools and technologies that can be applied to to make life a lot smoother instead of just trying to like okay how many people can I this and that or how can I push the business it's it's instead of fighting up against the resistance just becoming sharper becoming more agile becoming more capable with tools Technologies knowledge will make you more attractive people will say hey how are you doing that hey where did you learn that hey can you teach me that hey h how are you getting those kind of results it's because of the input and if you wish to share your journey I'd love to hear how you start growing yourself there's a lot of amazing news from TLC in fact I was on uh a a update call from my sponsor who is in Hong Kong for that uh private leadership event that happened for for the Chinese leaders there and uh he told me some great stuff that are on the horizon of being released in the next day or two I won't say what they are because I will leave it up to the company to announce it when they do but this should be a very very Progressive uh week for TLC a lot of one wonderful things that we've been uh w

## **Conceptual Website Structure:**

### **1. Homepage:**

- 

### **Hero Section:**

- 

Headline: "**Build Your Team Once, Earn Multiple Income Streams Forever**" 1...

- 

Sub-headline: "**Join The Gifting Tribe and unlock a diversified ecosystem of opportunities starting from just \$7.**" 1...

- 

Brief overview of the core problem solved: "**Tired of programs that disappear and having to restart your team? Discover a revolutionary platform built on the blockchain.**" 3...

- 

Call to Action: "**Get Started for \$7**" or "**Explore Opportunities**" 1...

-

## **Featured Opportunities/Highlights Section:**

- Showcase the main pillars discussed in the videos.
- 
- Example: **Pop Social / Pop Max:** "Get Paid to Use Social Media" - Brief description of Pop Social (Web3, AI, pays for engagement) and Pop Max (staking, daily earnings, optional referrals)16.... Link to a dedicated page.
- 
- Example: **The \$7 Program Umbrella:** "Your Gateway to Diversified Income" - Mention the concept of multiple income streams (Forex, Crypto, Travel, etc.) under one team structure1.... Link to a dedicated page.
- 
- Example: **Building on the Blockchain:** "Own Your Network" - Explain the significance of building a team on the blockchain for long-term stability and earning potential across different projects3....
- 

## **Problem/Solution Section:**

- 
- Problem:** Highlight the common issues in the online earning space: too many scams, unsustainable programs, unethical owners, having to constantly rebuild teams2....
- 
- Solution (My Business Club):** Present the platform as the solution – a single platform (My Business Club) with genuine opportunities, built on the blockchain to secure your network2....
- 

## **Community & Support:**

- 
- Briefly mention the community aspect – joining "The Gifting Tribe," access to Zooms and resources5....
- 
- Call to Action: "**Join Our Community**" (Link to Telegram/Facebook groups)5....
- 

**Testimonials/Social Proof:** (Implied value, could feature screenshots or mentions of earnings if available in sources)22....

•

**Footer:** Include contact links and essential navigation.

## **2. About Us Page:**

- 
- Our Mission & Vision:** Detail the goal to empower members with genuine opportunities for wealth building and creation2.... Emphasize the long-term legacy project approach7....
- 
- Backstory & Founder:** Share the origin story of the \$7 program, the founder's extensive experience and success in the industry7.... Explain the intention behind creating a platform that solves the problem of restarting teams2....
- 
- The Gifting Tribe:** Explain the community name and its mission "of making the most to gift back the most"5. Mention giving back through opportunities, information, and offline charity5....

- **Why We Are Different:** Reiterate the key differentiators – one team structure, multiple income streams, blockchain foundation, focus on real businesses and profits, solving the industry's core problems1....

### **3. Opportunities Page (or section, potentially with sub-pages for major projects):**

- 

- Introduction to the Ecosystem:** Explain that the platform is an umbrella for diverse opportunities1....

- 

### **The \$7 Program / My Business Club Core:**

-

- 6. Contact Us Page:**
  - Ways to get in touch with the team/community leader.
  - List the provided social media links again with a brief description of how they are used for communication5....
  - Facebook: <https://www.facebook.com/share/g/16VeVjBwTd/>
  - Instagram: <https://www.instagram.com/salkhanempire/>
  - Telegram: <https://t.me/PopMaxTribe>
  - Pop Max Telegram: @popsocialmax
  - YouTube: <https://www.youtube.com/@TheGiftingTribe>
  - Consider a contact form for general inquiries (standard website feature, not explicitly mentioned in sources, but practical).

- Reiterate the personal touch philosophy27....

## **7. Specific Project Pages (e.g., Pop Max/Pop Social, My Business Club, potentially others depending on importance):**

- These pages would expand on the brief descriptions in the Opportunities section, providing full details, benefits, how-to's, compensation specifics, and relevant resources *for that specific project*, drawing heavily from the relevant transcripts.

### **Key Concepts and Unique Selling Points to Emphasize Throughout:**

- **One Team, Multiple Incomes:** The core concept of building a single network that generates revenue from various opportunities1....
  - **Blockchain Foundation:** Owning your team structure for long-term sustainability and earning potential3....
  - **Solving Industry Problems:** Directly addressing issues of scams, unsustainable programs, and the need to constantly restart2....
  - **Diversified Opportunities:** Featuring a mix of passive and active income streams in trending markets1....
  - **Low Entry Point:** Highlighting the accessible \$7 starting option1....
  - **Value Proposition:** Emphasizing that even the lowest tier offers value (Namaste app) and higher tiers unlock significant benefits and education3....
  - **Daily Earnings & Fast Withdrawals:** Highlighting the frequency of earning and the speed/ease of withdrawing profits1....
  - **Credibility & Substance (especially for Pop Max/Social):** Mentioning funding, exchange listings, experienced team, and physical/digital footprints11....
  - **Community & Support:** The active team culture, resources, and personal approach5....
  - **The Million-Dollar Potential:** Showcasing the significant bonus opportunity6....
- This outline structures the content from your YouTube transcripts into a logical website flow. Remember that this is a conceptual design based *only* on the provided text and does not incorporate specific design elements or layouts from your inspiration website (grantcardone.com) due to my inability to access external sites. You would use this structure and the extracted content as the foundation for building the actual website.
